

CleanChoice Energy pairs the energy your home uses with renewable energy sources through the purchase of wind and solar Renewable Energy Certificates (“RECs”). By purchasing and pairing RECs with your electricity services, you are using and receiving the benefits of renewable electricity. Increased demand for, and generation of, renewable electricity can help reduce conventional electricity generation from fossil fuels in the region where the renewable electricity generator is located.

Your service will always include 100% wind and solar RECs and the specific mix of each resource may vary year-to-year. While CleanChoice Energy has not yet committed to specific RECs for your service, last year we procured and retired RECs as follows:

*Delaware*

In 2020, we procured RECs for customers in your state from: Illinois, Virginia, and North Carolina.

*Illinois*

In 2020, we procured RECs for customers in your state from: Illinois, Iowa, and Indiana.

*Maryland*

In 2020, we procured RECs for customers in your state from: Maryland, North Carolina, Pennsylvania, Illinois, and Iowa.

*Massachusetts*

In 2020, we procured RECs for customers in your state from: Massachusetts, New York, Pennsylvania, Illinois, North Carolina, and Maine.

*New Jersey*

In 2020, we procured RECs for customers in your state from: New Jersey, North Carolina, Illinois, Iowa, and Maryland.

*New York*

In 2020, we procured RECs for customers in your state from: New York, Pennsylvania, Illinois, Maryland, Ohio, Indiana, Kentucky, and Michigan.

*Ohio*

In 2020, we procured RECs for customers in your state from: Pennsylvania, Illinois, Indiana, and North Carolina.

*Pennsylvania*

In 2020, we procured RECs for customers in your state from: Pennsylvania, North Carolina, Illinois, Iowa, and Michigan.

*Washington D.C.*

In 2020, we procured RECs for customers in your state from: North Carolina, Pennsylvania, Illinois, Virginia, Iowa, Maryland, Washington, D.C., Ohio, Kentucky, Michigan, and Delaware.
