

How Billing Works

You'll receive two bills:

One from ConEd, and one from CleanChoice Energy*

conEdison

Sample

Your billing summary as of Jan 6, 2019

Your new charges
Billing period: Dec 3, 2018 to Jan 6, 2019

Electricity charges – for 35 days	\$100.00
Adjustments	-\$88.00
Total new charges	\$12.00
Total amount due	\$12.00

Your solar credits will reduce the total amount you owe the utility

CleanChoice ENERGY*

Sample

Your Community Solar Monthly Invoice

Invoice Date: 02/07/2019

Your Account Summary

Current Charges (Subscription Price x kWh Produced)	\$84.00
Adjustments	\$0.00
Balance Transfer	\$0.00
Late Fee	\$0.00
Early Termination Fee	\$0.00
Total Amount Due	\$84.00

You'll receive your CleanChoice bill about a month after your solar credits are reflected on your utility bill

You pay 5% less than the value of the credits you received

*IMPORTANT: Community Solar offers you bill credits at a 5% discount for up to 80% of your home's energy usage for a three year term. Your subscription price and your bill credit rate are subject to change each month over the term of your Agreement, but your price will always be a 5% discount to the credits you receive. Your current energy supply will stay the same and the environmental benefits of the solar energy production will go to the New York State Energy Research and Development Authority. An early cancellation fee of \$200 applies if you cancel with less than 90 days' notice. Limited to well-qualified applicants. Terms and conditions apply.

Sample Billing Breakdown

Save money while supporting 100% clean energy.

Without Community Solar:

ConEd Bill

Utility Charges:	\$100.00
Total:	\$100.00

Total You Pay: \$100.00

With Community Solar:**

ConEd Bill

Utility Charges:	\$100.00
Solar Credits:	-\$88.00
Total:	\$12.00

CleanChoice Bill

Total:	\$84.00
---------------	----------------

Total You Pay: \$96.00

That's \$4 in savings this month!

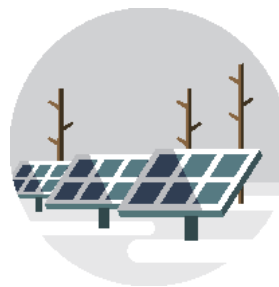

Savings by the Season

Your monthly savings will vary based on seasonal production and your consumption.

Summer

You may notice your Community Solar bill and bill credits are higher during months when the farm produces more solar energy. If your solar farm subscription produces more credits than you can use in a single billing cycle, these credits can roll over and apply to future utility bills.

Winter

During months with shorter days, you may notice fewer bill credits applied to your utility bill. Previously earned credits may be applied towards your current balance. Your Community Solar bill and bill credits are lower the farm does not produce as much solar energy.
