

How Billing Works

You'll receive two bills:

One from National Grid, and one from CleanChoice Energy*

Sample

nationalgrid

SUMMARY OF CURRENT CHARGES

Electric Service	\$100.00
Other Charges/Adjustments	-\$88.00
Total Current Charges	\$12.00
Amount Due	\$12.00

DETAIL OF CURRENT CHARGES (page 2)

Community Net Metering Adjustment	
0.155390 x 566 kWh	-\$88.00

Your solar credits will reduce the total amount you owe the utility

Your monthly bill credit is your bill credit rate multiplied by the solar energy (kWh) produced by your share of the farm

Your Community Solar Monthly Invoice

Invoice Date: 02/07/2019

Your Account Summary

Current Charges (Subscription Price x kWh Produced)	\$80.00
Adjustments	\$0.00
Balance Transfer	\$0.00
Late Fee	\$0.00
Early Termination Fee	\$0.00
Total Amount Due	\$80.00

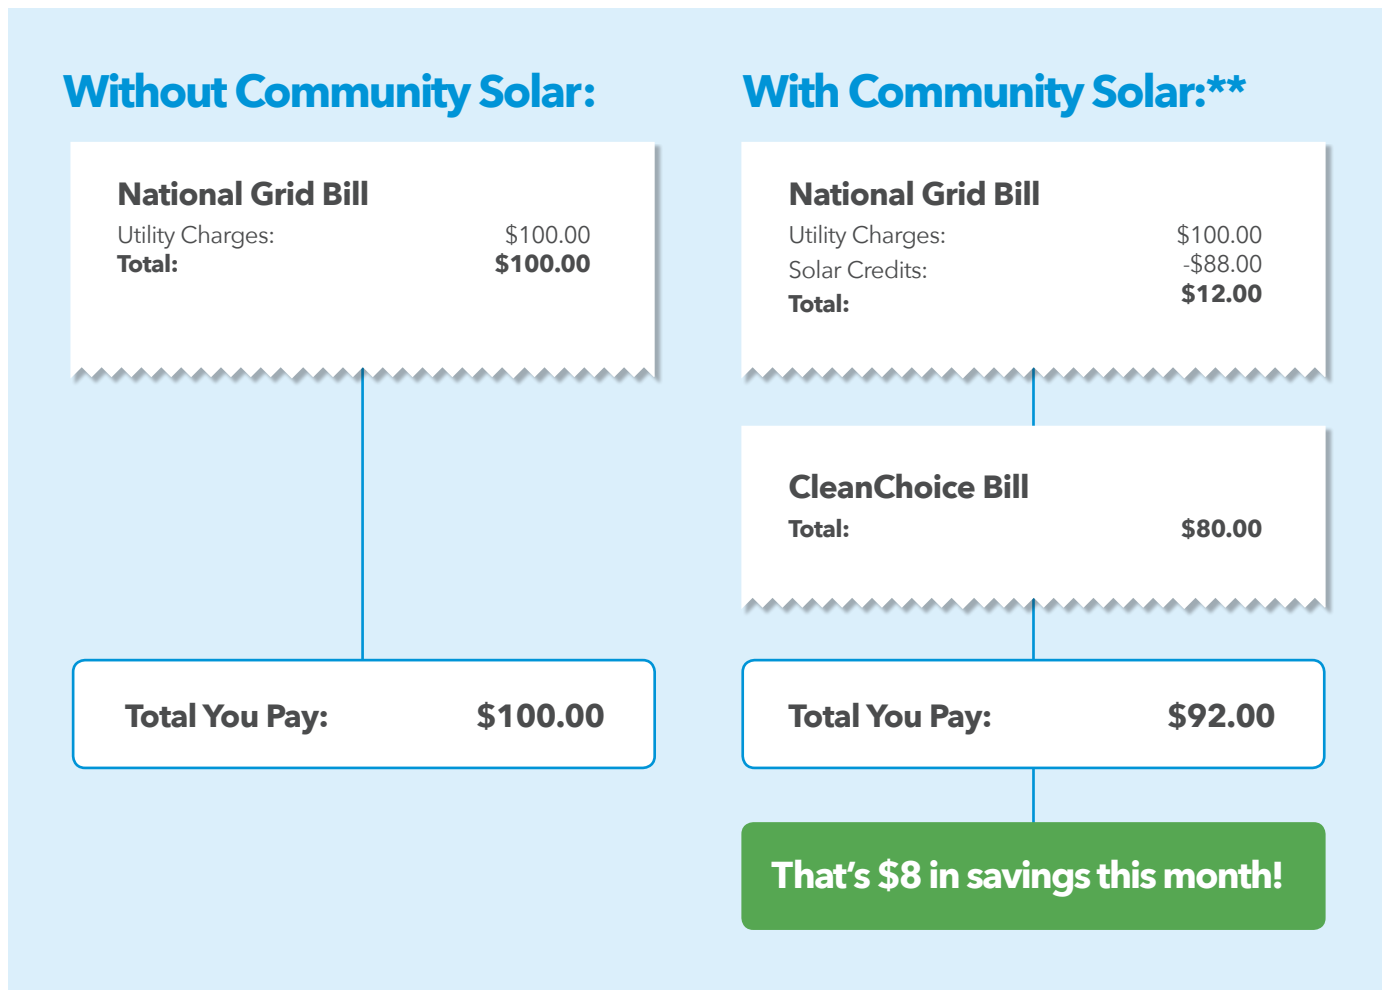

You'll receive your CleanChoice bill about a month after your solar credits are reflected on your utility bill

You pay 10% less than the value of the credits you received

*IMPORTANT: Community Solar offers up to twenty years of Alternative On-Bill Credits ("AOBCs") for your subscription to a solar farm. The value of AOBCs is not guaranteed and may increase or decrease over the term of the agreement based on your utility's tariffs. The subscription rate is a 10% discount to the AOBC you receive and is not regulated by the Massachusetts Department of Public Utilities. Savings are not guaranteed. You may be subject to an early termination fee of \$200. Although you are not using solar power generated by the solar farm, your purchase of AOBCs supports solar development in MA. Limited to well-qualified applicants. Terms and conditions apply and are subject to change. Review the Subscription Agreement for additional details.

Sample Billing Breakdown

Save money while supporting 100% clean energy.

Savings by the Season

Your monthly savings will vary based on seasonal production and your consumption.

Summer

You may notice your Community Solar bill and bill credits are higher during months when the farm produces more solar energy. If your solar farm subscription produces more credits than you can use in a single billing cycle, these credits can roll over and apply to future utility bills.

Winter

During months with shorter days, you may notice fewer bill credits applied to your utility bill. Previously earned credits may be applied towards your current balance. Your Community Solar bill and bill credits are lower when the farm does not produce as much solar energy.
